INTEGRATION

# INNOVATIVE WORKPLACE TECHNOLOGY SOLUTIONS

## Challenge

In relocating headquarters and moving 150 employees into a new building, staffing firm CSI Companies recognized the need to integrate a modernized workspace designed to engage employees, customers, and visitors. CSI Companies sought immersive office technology and assistance with implementing a holistic approach to setting up key technology throughout the new building.

## Solution

Phase Integration's ability to streamline a commercial technology plan adaptive to any project helped CSI Companies formulate a single solution for their new headquarters' workplace technology needs. Starting with an in-depth discovery process to understand the staffing agency's needs, Phase Integration created a comprehensive plan based on CSI Companies' ideal end-user experience and system functionality.

Through Phase Integration's complete menu of workplace technology services, our consultants helped maximize synergies between applications and streamlined CSI Companies' planning, coordination, and execution during the project.

Our audiovisual technology presented solutions that enhanced workplace operations. Phase Integration implemented a streamlined system making it easy for guests to check in to the building using digitally enabled processes. We also provided digital signage solutions

Keyless entry

Digital guest kiosk

Room scheduling

Video conference

Virtual training room

Digital signage

Structured cabling

that give The CSI Companies' employees access to remotely update digital marketing and displays throughout the office using a computer, smartphone, or tablet. By integrating video conferencing into shared spaces, employees can now virtually connect across company lines of businesses and meet with clients with the press of a button.

The need to transfer technology to the new headquarters required a multi-phased installation process. Phase Integration's structured cabling solutions provided project management over the technology development and design of the new workspace. A visual blueprint of the technology design was presented outlining each step and outcome of the project.

### Results

- Project was completed on time and under budget, saving CSI Companies a quarter of the estimated cost
- Choice of a security access by scanning your mobile phone or tapping a badge
- Seamless onboarding and training process with a virtual environment
- Improved team engagement encouraging social and health progress
- Named one of Jacksonville Business Journal's Coolest Office Spaces 2021
